

SIDE TANK SOLUTION

Envirosure offers an extension to their Transport Clean-Up policy, called Side Tank Solution. This covers the side tank (self-powered) diesel spill clean-up and rehabilitation costs. In the event of an accident, on many occasions the diesel side tank is ruptured, spilling its diesel into the environment. These types of spillages can range from 10 litres to 1000 litres, often covering a large road surface and road shoulder.

This can create an environmental problem for the surrounding environments, which may result in large clean-up and disposal costs. Due to the loss of fuel from an incident, causing the side tank cover to respond, Envirosure's side tank cover will also include a fuel reimbursement voucher to the maximum value of R5 000 per claim. Subject to 1 claim per every 5 vehicles on cover, within a 12 month period.

The insured client is required to report every side tank incident to the Envirosure call centre on 0860 44 44 11.

BENEFITS

Option 1 gives cover for clean-up and rehabilitation costs up to R100 000.
Option 2 gives cover for clean-up and rehabilitation costs up to R200 000.
